

450W High Reliable Ultra Wide Output
Range Intelligent Battery Charger

NPB-450NFC

Test Report: NPB-450-24NFC

450W High Reliable Ultra Wide Output Range Intelligent Battery Charger

- DESIGN VERIFY TEST

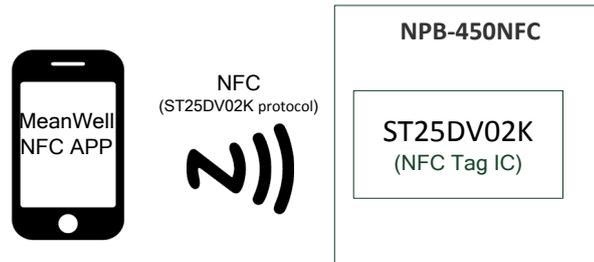

NPB-450NFC

TEST MODEL: NPB-450-24NFC

TESTING NOTES:

1. According to the testing files, make sure that the parameters and actions are correct.
2. The mobile phone system should be iOS or Android (model). Be paired with the Meanwell NFC App.
3. System configuration diagram.

● **NPB-450NFC TEST**

TEST CONDITION: Mobile Phone System: IOS 15.7.1 (model); Meanwell NFC App

1. READING TEST

No.	TEST ITEM	TEST CONTENT	TEST CONDITION	RESULT	CONCLUSION
1-1	MODEL CONFIRMATION	Be close to NPB-450NFC, and make sure that the model can be read by Meanwell NFC APP. 	(1) Model Confirmation MODEL: "NPB-450-24"	(1) Model: <u>NPB-450-24</u>	PASS
1-2	OUTPUT CURRENT SETTING VALUE CONFIRMATION	Be close to NPB-450NFC, and make sure that the charging parameters can be read by Meanwell NFC APP. 	(1) Read Constant Current 13.5 amp. (2) Read Constant Voltage 28.8V. (3) Read Float Voltage 27.6V. (4) Read Tapper Current 1.35 amp. (5) Read Restart Charging Curve Voltage 26.4V.	(1) Confirm Constant Current Value 13.5amp. (2) Confirm Constant Voltage Value 28.80V. (3) Confirm Float Voltage Value 27.60V. (4) Confirm Tapper Current Value 1.35amp. (5) Confirm Restart Charging Curve Voltage 26.4V.	PASS

2. SETTING TEST

No.	TEST ITEM	TEST CONTENT	TEST CONDITION	RESULT	CONCLUSION
2-1	CC CURRENT SETTING	Be close to NPB-450NFC, and set the current value.	Be close to NPB-450NFC, and set Max. Current, Min. Current and Pre-defined Current.	Setting Confirmation 1. Max. Current: 13.472 amp 2. Min. Current: 2.703 amp 3. Pre-defined Current: 13.5 amp	PASS
2-2	CV VOLTAGE SETTING	Be close to NPB-450NFC, and set the voltage value.	Be close to NPB-450NFC, and set Max. Voltage, Min. Voltage and Pre-defined Voltage.	Setting Confirmation 1. Max. Voltage: 42.04V 2. Min. Voltage: 21.029V 3. Pre-defined Voltage: 28.843V	PASS
2-3	FV VOLTAGE SETTING	Be close to NPB-450NFC, and set the voltage value.	Be close to NPB-450NFC, and set Max. Voltage, Min. Voltage and Pre-defined Voltage.	Setting Confirmation 1. Max. Voltage: 42.028V 2. Min. Voltage: 20.997V 3. Pre-defined Voltage: 27.615V	PASS
2-4	TC CURRENT SETTING	Be close to NPB-450NFC, and set the current value.	Be close to NPB-450NFC, and set Max. Current, Min. Current and Pre-defined Current.	Setting Confirmation 1. Max. Current: 4.055 amp 2. Min. Current: 0.275 amp 3. Pre-defined Current: 1.345 amp	PASS
2-5	CHARGING STAGE SETTING	Be close to NPB-450NFC, and set the charging stage.	Be close to NPB-450NFC, and set the charging stage to 2 stage or 3 stage.	Setting Confirmation 1. 2 stage setting: <u>OK</u> 2. 3 stage setting: <u>OK</u>	PASS
2-6	INTELLIGENCE CHARGING SETTING	Be close to NPB-450NFC, and set intelligence charging.	Be close to NPB-450NFC, and set charging mode to INTELLIGENCE or CURVE.	Setting Confirmation 1. INTELLIGENCE setting: <u>OK</u> 2. CURVE setting: <u>OK</u>	PASS
2-7	PASSWORD SETTING	Be close to NPB-450NFC, and set the password.	Be close to NPB-450NFC, and set the password to “meanwell”, “MEANWELL”, “12345678” or password-less.	Setting Confirmation 1. “meanwell” setting: <u>OK</u> 2. “MEANWELL” setting: <u>OK</u> 3. “12345678” setting: <u>OK</u> 4. Password-less setting: <u>OK</u>	PASS
2-8	RESTART	Be close to	Be close to NPB-450NFC,	1. 2 stage: 26.38V	PASS

	CHARGING VOLTAGE SETTING	NPB-450NFC, and set the restart charging voltage.	and set the restart charging voltage to 26.4V.	2. 3 stage: 26.39V
